neterra.net

Neterra is a global communications service provider and IT assets manager. A partner and supplier for **AT&T, Verizon Business, Bharti Airtel, Comcast, NTT**, 75% of the world's top 20 telecoms by market cap rely on Neterra for their off-network business.

Neterra were among the pioneers that **started the Internet industry in Bulgaria**, 30 years ago, and is an industry leader with its own data centers, IaaS cloud platform, global layer 2 data network, award-winning Internet exchange platform, and satellite services.

The founder, **Neven Dilkov**, is a USA-educated IT professional who started the business in 1996 and is still the majority owner and CEO.

The company **doubled its revenue** in the past 4 years and has ambitious plans to double it again in the next 3 years. Currently, we have active **last-mile access and network management** services in **76** countries in the world.

Neterra is a **Starlink authorized reseller**, authorized **supplier of data services**, partner for building **Starlink landing stations**, as well as an **authorized Starlink maintenance partner**.

The company has been recognized as the **"Best Connectivity Provider in Central and Eastern Europe"** for 2023, 2024 and 2025 in the Capacity Media's Global Connectivity Awards.

NetIX (a Neterra brand) has won the **Best Internet Exchange** for 2018 and 2025 and is in the top 10 of global IXs, in terms of the number of IP networks connected.

Neterra has operating companies and licenses in the **EU** (Bulgaria), the **USA, Brazil, Singapore**.

We are registered as a **supplier for NATO** tenders and have employees with classified access approval from the Bulgarian Ministry of the Defense.

SERVICES

Connectivity

Neterra Enterprise Internet Access

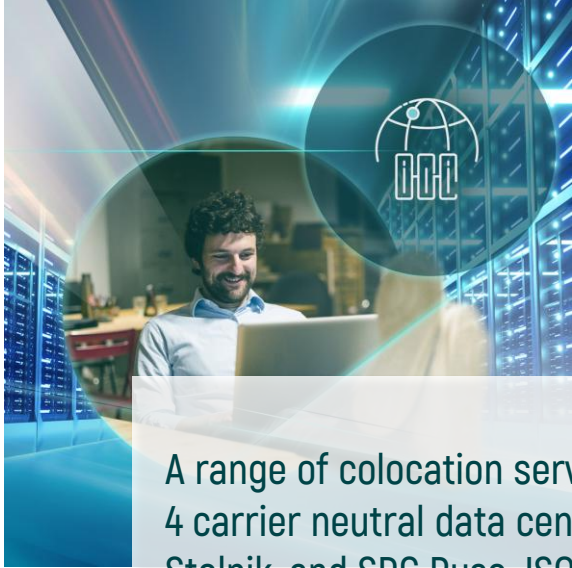

Neterra built an enterprise network layer on top of its global data network for the provision of services to its corporate customers. The network is centrally managed and uses hybrid technology in the last mile, that combines multiple connectivity options to deliver robust, scalable, and high-speed internet access or point-to-point connectivity.

For each customer location and requirement, Neterra employs one or more upstream providers—including fibre, LTE/5G mobile, wireless radio relay, and LEO satellite, etc. More than 1000 global suppliers are onboarded globally.

Neterra's Hubs are distributed globally to provision and manage the services. Neterra Hubs are no farther than 30ms latency from customer locations. To meet geolocation and local connectivity requirements, Neterra provisions additional hubs.

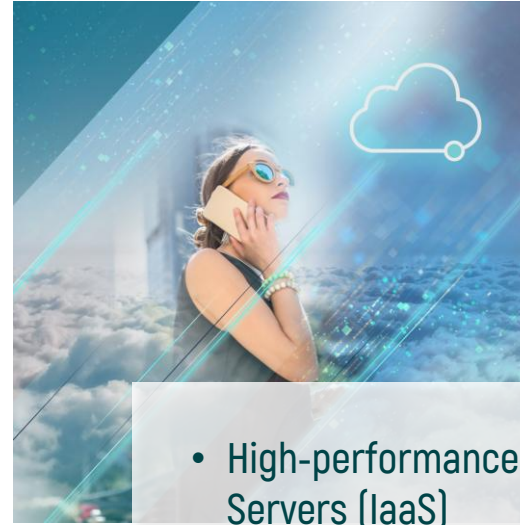

Sofia Data Center

A range of colocation services in 4 carrier neutral data centers - SDC 1 & 2, SDC Stolnik, and SDC Ruse. ISO and PCI DSS certified, with a strategic location in Southeastern Europe. Top telecoms and over 50 cable owner operators are collocated in the SDC, relying on high power, security, low latency, and 24/7 professional support.

NVMe Cloud and Dedicated Servers

- High-performance NVMe scalable Cloud and Dedicated Servers (IaaS)
- Backup-as-a-service (BaaS)
- IT Assets Management
- Certified by ISO and PCI DSS
- DDoS Protection
- IPv4 resources for sale or rent

MANAGED SERVICES

We think together with you in searching for working solutions

We manage:

- Devices
- Servers
- Layer 2 networks
- Layer 3 networks
-ask us about what else

You get:

- Services tailored for you
- Best-in-class support
- Experienced team to assess and design your IT resources and optimize the cost

CUSTOMER PORTAL

Once activated, your service becomes visible in the Neterra Online Portal – enabling real-time monitoring, management, and control of all connectivity services.

The platform offers:

- Live status by location
- Customizable overlays for health, bandwidth, and key metrics (latency, signal quality, jitter, etc.)
- Real-time & historical insights for performance tracking
- Drill-down access to detailed data

CERTIFIED EXCELLENCE & SECURITY

Neterra holds multiple international certifications ensuring top standards in quality, security, and continuity:

- ISO 9001 – Quality Management
- ISO 20000-1 – IT Service Management
- ISO 27001 / 27701 / 27018 – Information Security, Privacy & Data Protection
- ISO 50001 – Energy Management
- ISO 22301 – Business Continuity
- PCI DSS – Payment Card Data Security

These standards, combined with our commitment to quality, enable us to deliver trusted, secure, and sustainable connectivity services worldwide.
