# SDC 1

- Located in Sofia, Bulgaria, close to the airport and main business areas
- Meets highest earthquake resistance requirements
- Over 90% of international telecom operators that manage traffic at the global level (Tier I providers) have equipment and a point of presence in it

## Technical Parameters

- Total power available - 1MW
- Number of GRID lines - 2x
- Colocation space - 220 racks
- TIER III compliant data rooms

# SDC 2

- Strategic location, connecting West Europe with the Middle East and Asia
- At the same data center campus with SDC 1
- Last generation of energy-efficient air-conditioning installations - benefits for the environment and lower cost of electricity
- The main point for interconnecting the networks of hundreds of telecommunications operators in Sofia (cross-connect), as well as the main point of presence in Bulgaria of the global Internet Exchange - NetIX

## Technical Parameters

- Total power available - 1,6 MW
- Number of GRID power lines - 2x
- Colocation space - 280 racks
- TIER III compliant data rooms

Visit SDC 2 virtually on videotour.sdc.bg

# SDC Stolnik

- Located in Stolnik Data Center Park - close to Sofia, the biggest telecom and data center hub in the SEE region, 20 minutes from Sofia Airport
- Special offers for crypto-mining customers
- Unlimited colocation space and power redundancy

## Technical Parameters

- Total power available - 2 MW (Technical feasibility for up to 150 MW)
- Colocation space - 24 racks
- TIER III compliant data rooms
- Crypto-mining data rooms

# SDC Ruse

- Strategic location
- Disaster recovery data center
- Located on the Romanian-Bulgarian border
- Redundant connectivity
- Fiber optics across the border connect Neterra's SDC Ruse and Romanian Internet service providers who can easily and efficiently connect to the Bulgarian telecom market and reach the Eastern European countries

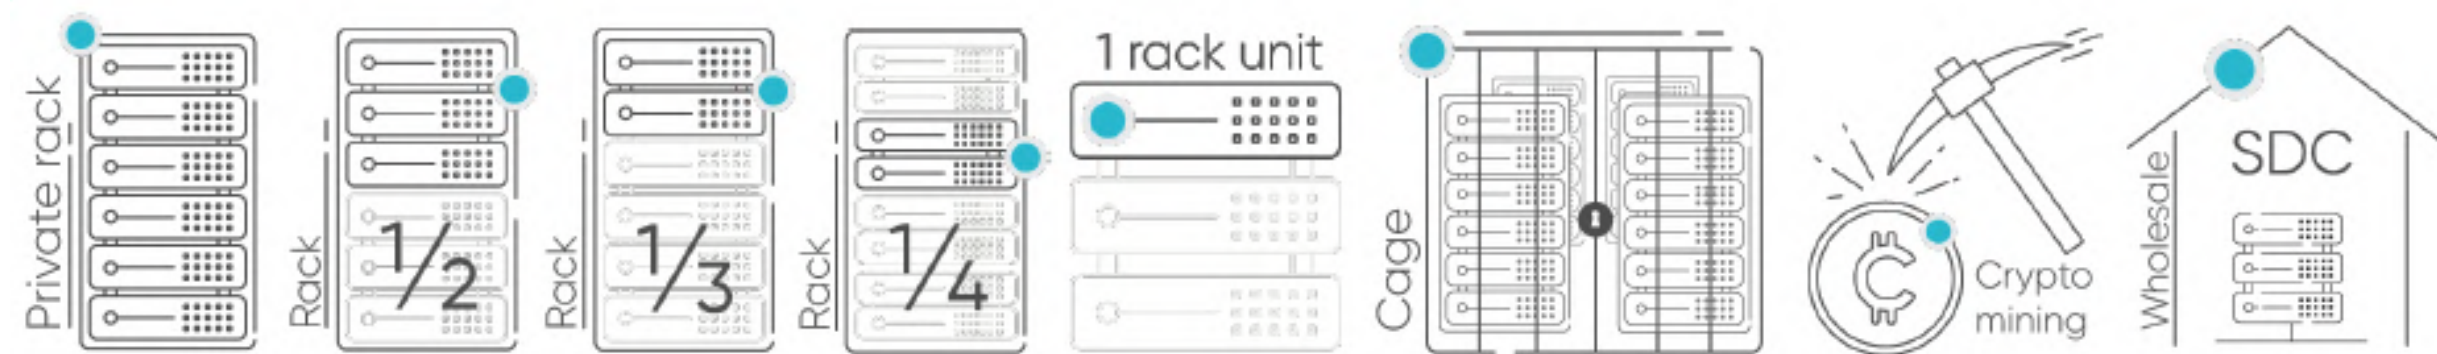

## Technical Parameters

- Total power available - 0,13 MW
- Number of GRID power lines - 1 x
- Colocation space - 16 racks
- Landing point of BFOR (strategic location)
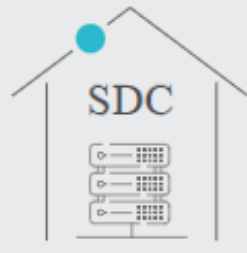

# Colocation at SDC

- Redundant power supply and air conditioning for your peace of mind
- 24/7 Network Operations Center (NOC) and on-site expert support to keep everything always running smoothly
- Energy-efficient technologies and a support team to optimize your operating costs
- Full access and control over the management of your servers
- 24/7 security and video surveillance
- Services customized to your needs
- Service-level agreement (SLA) – up to 100%
- Tailor made solutions

# Support Services & Connectivity

**Equipment installation**

**Secure data center storage**

**Data center migration**

**24 / 7 monitoring & support (NOC)**

**Hands-on-site**

**Cross connect**

**Data center connect**

**PoP`s connect**
